

Cliff GINN

Democrat For State Senate

A leader in education

Cliff drafted and helped pass the Opportunity Maine law, which effectively makes college more affordable in Maine than anywhere in the country, while keeping Maine's graduates in the State. He brought Republicans and Democrats together, and will continue to build consensus around vital investments in education.

We must provide educational opportunity for our citizens and develop our workforce.

- Integrate higher education and workforce development programs to make it easier to plan for, attend and afford college
- Remove social barriers to college through stronger early college, adult ed and transition programs
- Ensure that apprenticeship, certificate and degree programs meet business needs and provide career pathways

We need to do much more for our youngest kids. Smart investments in infants and toddlers will promote success in education, raise incomes and lower state spending down the road!

- Move toward universal preschool
- Raise quality standards for childcare, increase affordability and invest in developing the childcare workforce
- Ensure proper nutrition, healthcare and other interventions for young children, and give parents the education and support they need

In K-12, we have to continue Maine's record of excellence, get more state aid for Portland and make sure resources go to the classroom, not excessive administration.
